

Seven Sisters Primary School
Half -Termly Homework Project.

Class: 6S

Due: 20th October 2024

Dear Parents and Carers,

Please support your child in completing the project below.

The children will be rewarded for completed projects. If you have any questions, please ask your child's class teacher.

We can not wait to see some amazing home learning!

This half term we are learning all about the circulatory system in science. Throughout the topic, children will learn about how blood is pumped around the body, what the role of the blood vessels is and the importance of blood in our bodies. We will make a number of models, including replicas of the heart, what blood is made up of and how a heart pumps. Using this knowledge, I would love to see you express your knowledge of the circulatory system in any way you like. This could be something similar to what we will have covered in school, or a creation of your own that we haven't covered. Please be adventurous!
